Background

- Users behavior have changed since last decade

- Preferring music streaming services rather than going to music store physically

- Challenging to collect all relevant songs

Problem

Do you want to listen to similar songs which you usually listen but lazy to google ?

Or does the Google give you always same result?

Do you see yourself in this picture?

- Loves rock
- Buys Rock CD
- Wants always listen similar songs and songs from same artist
- Ends up with similar music after a lot of research

Our Song Recommender can solve your problem !

At last, you have unique experience as an user

Solution

We have developed a new product which gives you similar song recommendation based on audio features.

How our Song Recommender works?

Step 1.
Input your song

Step 2. Song recommender works in the background

Step 3.
